BTR1 ADVANCED

Bluetooth® 4 people up to 1.2 km

Intercoms.

BTR1 ADVANCED

It represents the Midland 2022 intercom with the best price/performance. Ahead of the others in its category, it is equipped with a technology that allows 4 people to communicate with each other up to a distance of **1,200 m** between motorcycle and motorcycle in **Conference** mode.

BTR1 ADVANCED is first also in the quality of the sound, which reaches the ears of the motorcyclist through a **dedicated audio system**, designed by RCF R&D.

The new intercom promises a “weekend” duration of operation, **compatibility** with models of other brands, with smartphones, navigators and TFT dialogue systems present on the dashboards of many motorcycles.

KEY POINTS

High Definition Sound by RCF

An audio system that guarantees maximum performance in any condition of use.

DNK™ function (Digital Noise Killer) that reduces wind and engine noise up to 80%.

23 hours' autonomy

Long distance (you talk up to 1.2 km)

Compatibility with TFT and with the main connectivity and control systems (BMW, KTM, Ducati...).

- Firmware update from PC via USB
- TFT system compatibility

Unlimited communications via

BTTALK APP

COMPLIANCE

Compliant with the RE-D
2014/53/EU regulation

....

The compatibility with the outside, offered by this new model, should be emphasized. The **Universal Intercom** function allows it to communicate with intercoms (up to 2) produced by other brands. The technological heart of BTR1 ADVANCED allows connection with smartphones (up to 2), listening to incoming messages from GPS navigators and communicating with the main connectivity and control systems via TFT displays on the latest generation motorcycles.

The BTR1 ADVANCED shares the design and control ergonomics with the top-of-the-range RUSH RCF model. The complete design of the MIDLAND intercom line is strictly **Made in Italy**.
