

MIDLAND G7 Pro

Two Way Radio with 16 PMR446 and 69 LPD channels

- Dual Band LPD/PMR Radio
- Rugged and ergonomic design
- VIBRACALL function
- Battery pack and desktop charger included

The Midland G7 Pro is a very high quality, robust and reliable handheld radio.

Technologically at the highest level, this radio is equally suitable for professional users who need to keep in touch with colleagues on construction sites, in buildings, hotels, at trade fairs and events, but also for recreational use.

With its sturdy housing and simple, attractive design, it is suitable for all areas of application.

The MIDLAND G7 Pro is very practical and easy to use. It uses both the PMR446 frequency range, which is approved in almost all of Europe, and the LPD frequency range around 433 MHz, which is also approved in some EU countries (see the table of usage restrictions in the user manual).

The MIDLAND G7 Pro has all the features you would expect from a cutting-edge handheld radio. Particularly noteworthy is the VibraCall alarm, with which you will not miss a call even in noisy environments. The operation time is optimized due to the automatic power saving mode (50% power saving). It also features an easy-to-read LC display with backlight and simple operation via centrally located control buttons.

NEW!

The device now has a larger display and can charge standard rechargeable batteries (4 x AA) in the desktop charger.

NOW ALSO AVAILABLE IN MULTI-DEVICE HARDCASES!
