Radio Accessories Earpieces.

MA PRO

Microphones with adjustable earpieces and PTT, some with spiral cables.

NEW compared to previous models

New look, feel and performance

40% more resistance

They have undergone intense tensile tests and have shown resistance to stretching, yield and break tests.

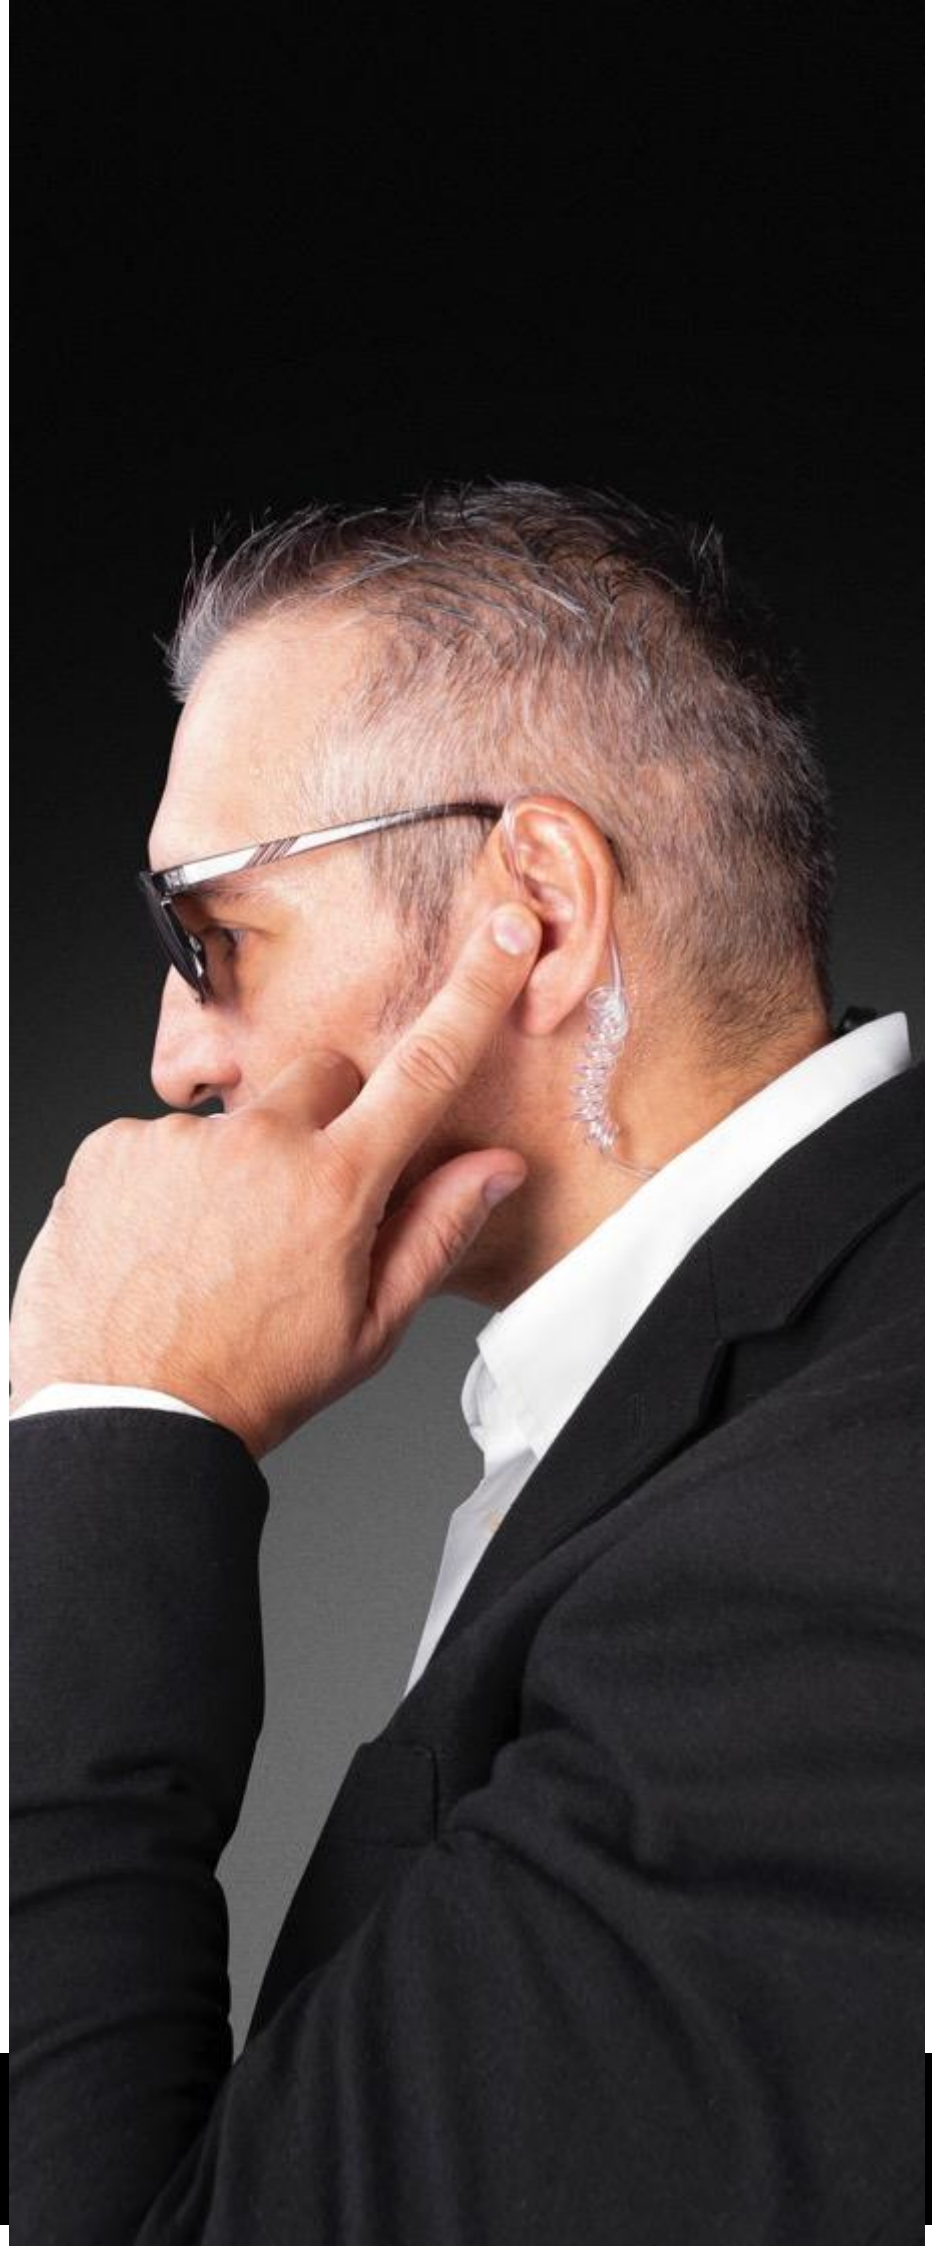

More robust and ergonomic mechanics especially in the PTT pressure phase.

30% more performing audio

A perfect modulation in terms of sharpness and sound quality.

Extremely robust

Mechanics and choice of materials suitable for intensive use.

Radio Accessories Earpieces.

MA 21 L PRO

The hook over the ear makes this earpiece very comfortable even for continuous use. During hunting, an airsoft game, for communication in the shop it will be easy to forget you are wearing it.

No configuration is needed; just connect it to your radio and you can start communicating.

With VOX/PTT
